

ECOPERLA REVO 2.0

YOUR PROBLEM

Are you concerned about contamination in tap water, but don't want to buy water in plastic bottles? Are you looking for a way to have unlimited clean water, but want to limit the waste of this valuable resource? Do you like technological innovations, but at the same time appreciate the simplicity and functionality of the solutions used? Do you need an intelligent kitchen filter.

OUR SOLUTION

Ecoperla Revo 2.0 reverse osmosis is the optimal solution to your water problems. Although it takes up little space, this system is a real filtration combine that removes all impurities with precision down to single ions. The included smart tap with an illuminated ring informs about the water quality.

GENERAL INFORMATION

The Ecoperla Revo 2.0 reverse osmosis impresses at first glance with its designer casing, but what is most important is inside - innovative solutions that guarantee exceptionally precise filtration and maximum comfort of using the filter. Thanks to the 800 GDP osmotic membrane, water is purified with great efficiency at the level of 2 l/min. The device's operation is subject to constant control, and new advanced safety systems guarantee trouble-free operation. A modern tap with an illuminated ring signals the quality of the purified water.

Filter dimensions (ht/wd/dp)	44,5 x 13,6 x 46 cm
Membrane	800 GPD
Capacity	3024 l/day, 126 l/h
Pressure (min/max)	1/4 bar
Temperature (min/max)	5/38 °C

*For those expecting even greater quality from their water: it is possible to upgrade our Ecoperla Revo 2.0 system with an additional component in the form of Ecoperla Elixir water revitalisation cartridge

FILTRATION STAGES

1. The 5-micron pre-filter combines the properties of a mechanical filter with activated carbon and a polyphosphate layer that protects the membrane from clogging
2. 800 GPD osmotic membrane removes bacteria, viruses, heavy metals, pesticides, nitrates, microplastics, and more
3. The final insert is filled with activated carbon, which is responsible for improving the quality of water, giving it the right taste, color and smell

WHAT'S INSIDE?

- Three high-quality, long-lasting cartridges
- Built-in microprocessor that controls the operation of the entire system and periodically flushes the cartridges
- Water leak detector
- TDS meter to check water quality
- Quiet pressure pump providing high water flows

DESIGN

- Slim housing made of durable plastic designed for vertical or horizontal mounting
- Smart tap with illuminated ring signaling purified water quality
- LED diodes on the front panel of the housing signaling the need to replace cartridges
- Filter inserts with built-in seals for quick and hygienic replacement of components

REVOLUTION IN YOUR KITCHEN
