

ECOPERLA ROCKET

YOUR PROBLEM

Do you want to be sure that your tap water is clean and safe for direct consumption? Do you value convenience in life and focus on minimalist solutions? Do you like it when high quality goes hand in hand with a good price? Install a kitchen filter in which advanced technology does not need additives.

OUR SOLUTION

The Ecoperla Rocket tankless reverse osmosis removes small solid impurities, disinfection by-products, heavy metals, viruses and bacteria and reduces the hardness of tap water. It is easy to use, takes up little space, delivers water quickly (1.6 l/min) and is easy to install.

GENERAL INFORMATION

The Ecoperla Rocket tankless reverse osmosis is a minimalist design combined with innovative filtration technology, enclosed in one compact housing. Thanks to the 600 GDP osmotic membrane, water is purified with good efficiency at the level of 1.6 l / min. Replacing the cartridges is easy and quick (PPC every year, RO every two years). Safe operation is guaranteed by the integrated anti-flood system and automatic lock, which stops the device if filtration lasts continuously for more than 30 minutes.

Filter dimensions (ht/wd/dp)	35,2 x 12,5 x 32,8 cm
Membrane	600 GPD
Capacity	2268 l/day, 96 l/h
Pressure (min/max)	1/4 bar
Temperature (min/max)	5/38 °C

*For those expecting even greater quality from their water: it is possible to upgrade our Ecoperla Rocket system with an additional component in the form of Ecoperla Elixir water revitalisation cartridge

FILTRATION STAGES

1. PPC cartridge – a combination of a mechanical filter with activated carbon removes small solid impurities and improves the organoleptic parameters of water
2. Reverse Osmosis Membrane – 600 GPD component eliminates remaining contaminants down to single ions, including bacteria, viruses, heavy metals, pesticides and microplastics

WHAT'S INSIDE?

- Two high-quality, long-life cartridges: PPC and RO
- Cartridge change indicators
- Integrated anti-flood system
- A pump that guarantees optimal water flow

DESIGN

- Minimalist design
- Slim housing made of durable plastic
- Can be mounted vertically or horizontally
- Trouble-free faucet with ceramic valve

SMALL SIZE, BIG CAPABILITIES
